

Available for: Windows 2000/XP/Vista/Windows 7 Version: Latest (v3.54) Developer: Max Havelaar Official Website: www.dcleaner.info
Price: Free, but with optional subscription File Size: 73.6 MB Publisher: Max Havelaar License: Shareware, Trial Installation: Drag and drop or use auto-detect Details: Introduction: DCleaner is an application that you can use to improve the performance level of your computer by removing unnecessary files. The interface of the program is standard. DCleaner can be easily used by individuals of any experience level. So, DCleaner can get rid of junk data found in temporary system and Internet files, XP prefetch, cookies, recent documents, Recycle Bin and third-party applications. Once you perform an analysis, you can run the cleaner, enable it to exit when the job is done, to confirm before deletion, hide while cleaning, and others. In addition, you can clean applications (e.g. WinRar), Internet and multimedia tools (e.g. Windows Media Player), utilities (e.g. Windows Defender) and Windows programs (e.g. Registry Editor, Paint). Furthermore, you can get rid of cache and cookies found in your web browsers, as well as access various tools from your computer, like Registry Editor, Task Manager and Control Panel. The program runs on a low amount of system resources and quickly finishes a task without freezing, crashing or popping up errors. On the other hand, DCleaner doesn't let you select specific files to clean. Plus, we would have liked to see an extended list when it comes to the types of applications that can be cleaned. We recommend DCleaner with reservations. Good: DCleaner is an application that you can use to improve the performance level of your computer by removing unnecessary files. Q: Finding a particular trigonometric integral I am trying to find a particular trigonometric integral $\int_0^{\frac{\pi}{2}} \frac{1}{1+\cos(x)} dx$ but I am getting a long messy expression. How should I approach this?

A: Just find the anti-derivative $\int \frac{1}{1+\cos(x)} dx$. Then split it in half and integrate each separately. The first integral is $\tan^{-1}(1)$ and the second is $\sin^{-1}(1)$. You should be able to get the integral you want in the end.

Relationship between glycosphingolipids and adhesion of human lymphoid cells to endothelial cells. The ability of human lymphoid cells (HLC) to adhere to purified endothelial cell (EC) monolayers was investigated. The adhesion of the HLC was found to be dependent upon the nature of the lipids of
