the same place for everyone. The

---

sky is always there, waiting to inspire, entertain, and remind you of your own insignificance. It has moods, weather, and trends, as well as the stars, clouds, and the sun. It is made up of the invisible gases that make up the universe and the particles that make up Earth and its atmosphere. The Sky at Sunset Sunset is a beautiful and romantic time of the day. The sky becomes orange, gold, pink, and even purple. The sun is setting and the clouds are yellow, orange, red, and even green. The

---

sunset sky is a celebration of the light of day. Whether you are on the beach or in the mountains, the sky becomes your window to the rest of the world. Be sure to take a moment to look at the sky, especially at sunset, and remember that the universe is the same no matter where you are.

### How Did People Discover the Sky?

People have been watching the sky for as long as they have been alive. They have been aware of its colors, clouds, stars, and patterns. People have been

---

learning about the sky, and learning about the sky is how the sky became named. In ancient times, people named the sky “Heaven” and the clouds were called “angels.” The stars were called “eyes” and the sky was called “heaven.” Some people didn’t like the name, “Heaven,” and they called the sky “sky” instead. The names we use today came from people naming the sky, but some names came from people not understanding what the sky was. They believed that the

---

gods, or angels, looked down on them from heaven. People were afraid of the sky, as well, because it was the source of the weather, and they thought the weather could bring death or good things.
